Tobias Anuf

+595 (971) 862-558 | tobiasanuf@gmail.com | linkedin.com/tobias-anuf | github.com/tobiascca | tobiascca.github.io

Technical Skills

Programming Languages: Java, Python, C/C++, SQL, NoSQL, JavaScript, HTML/CSS
Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, IntelliJ
Libraries: Pandas, NumPy, Matplotlib, Seaborn, OpenCV, Transformers, PyTorch, Tensorflow
Languages: Spanish (Native), English (Proficiency / C2)

Education

National Taiwan University of Science and Technology
3-semester exchange *Feb. 2025 – Present*

Universidad Politecnica Taiwan-Paraguay
B.E. in Information Engineering *Feb. 2023 – Present*

- ***Relevant coursework**: Computer Architecture, Operating Systems, Data Structures and Algorithms, Advanced Computer Networks, Digital Logic Design with Verilog*

Relevant Coursework

Introduction to Data Science Course Aug. 2024
Penguin Academy *Asunción, PY*

- Learned the data lifecycle, including data retrieval, management, and cleaning techniques for dataset quality
- Learned data manipulation and exploratory analysis using Pandas and created data visualizations with Matplotlib
- Gained experience building and training machine learning models using TensorFlow, Keras, and PyTorch

NVIDIA Deep Learning Institute Courses Aug. 2025 - Nov. 2025
NTUST *Taipei, TW*

- Fundamentals of Deep Learning
- Building LLM Applications With Prompt Engineering
- Building RAG Agents with LLMs

Java Programming Aug. 2025 – Nov. 2025
NTUST *Taipei, TW*

- Developed a Blackjack game for my end-of-semester project
- Learned Object-Oriented Programming in Java
- Learned to use different libraries for developing software

Relevant Projects

Vision-based-Autonomous-Driving-System | *Python, OpenCV, Raspberry Pi* June 2025 – Present

- Developed a vision-based autonomous driving system using computer vision
- Learned how to convert camera input into steering decisions using deep learning
- Gained experience in perception, model training, and real-time decision pipelines for autonomous systems
- Trained and evaluated models using frameworks like TensorFlow / Keras and used OpenCV for real-time image processing

Web Chatroom Application for Database Systems Course | *Python, SQL, MongoDB* June 2025

- Implemented a web-based chatroom system, handling real-time messaging, and backend logic using Python
- Gained experience with MySQL and NoSQL systems like MongoDB, understanding when to use each
- Learned to design database schemas and queries (SQL), including data storage and retrieval for chat data
- Integrated backend and database layers, developing skills in scalable system design for real-time applications
